AI Study Planner ChatBot

BY: SELINA DERSARKISSIAN

Figure 1: A diagram showing the connection between my learning goal and product

My Learning Goal

My learning goal is to learn how to create an AI programmed by Python.

python **code**

My Product Goal

I aim to create an AI-integrated planner, that provides personalized study plans for students to enhance their academic success.

```
index.html   app.py   app.cpython-313.pyc
app.py > check_reminder
130   def chat():
200           session['study_preferences'] = {}
201           session['study_preferences']['sleep_schedule'] = user_input
202           return jsonify({'response': "Got it! 💤 What time do you attend
203
204       # Step 9 - Ask for school/extracurricular schedule
205       if step == 9:
206           session['step'] = 10
207           session['study_preferences']['school_schedule'] = user_input
208           return jsonify({'response': "Noted! 🏫 What time blocks would y
209
210       # Step 10 - Ask for preferred study time blocks
211       if step == 10:
212           session['step'] = 11
213           session['study_preferences']['study_time_blocks'] = user_input
214           return jsonify({'response': "Perfect! ⏳ Now, for each subject,
215
216       # Step 11 - Ask for subject importance ranking
217       if step == 11:
218           session['step'] = 12

232          return jsonify({'response': "I couldn't find that subject. Pleas
```

Problem:

"How do I organize all my assignments and deadlines without feeling overwhelmed?"

"HOW DO I AVOID CRAMMING AND START STUDYING SMARTER, NOT HARDER?" **"Can someone help me adjust my schedule when unexpected things come up?"**

"Am I making real progress, or just busy without results?"

"How can I stay motivated when I feel stuck or tired of studying?"

"What's the best way to break big projects into manageable tasks?"

"How do I create a study plan that fits my pace and learning style?"

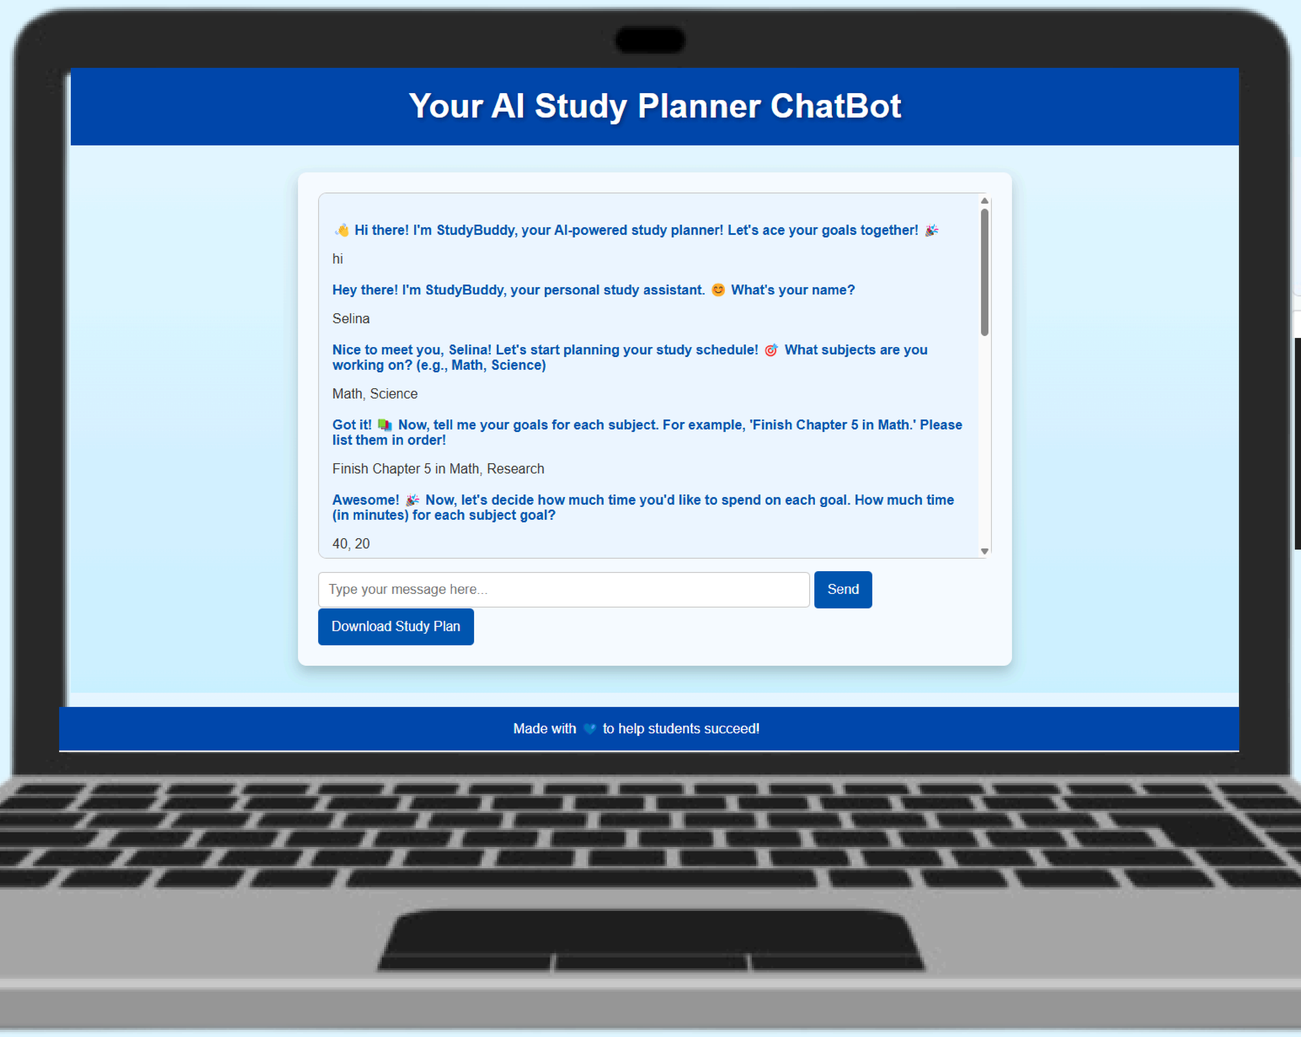

"I keep forgetting important due dates — how can I get reminders that actually help?"

"How can I balance schoolwork with my personal time and hobbies?"

"What should I study today to stay on track for my exams?"

Solution:

HTML CSS JavaScript **code**

```
index.html   app.py   app.cpython-313.pyc
templates > index.html > html
1   <!DOCTYPE html>

```

Features of the study planner:

The chatbot provides personalized study plans

The chatbot includes time management tools

Reminder

No upcoming deadlines in the next 24 hours. Keep up the great work!

The chatbot is aimed at students and includes suitable language

Your study plan is ready! 🎉 You can now click on 'Download Study Plan' anytime to see it. You can also mark your goals as done, or ask me for reminders!

Mark Complete Math

Great job! 🎉 You marked Math as done and earned 10 points! Total: 10 points. You're doing amazing! Keep up the great work! 🌟

Type your message here... Send

```
def generate_motivational_message():
    messages = [
        "You're doing amazing! Keep up the great work! 🌟",
        "Every small step counts! You got this! 💪",
        "Consistency is key, and you're on the right track! 🎯",
        "You're so close to your goals! Keep pushing! 🚀",
        "Your future self will thank you for all your hard work! 🔥"
    ]
    return random.choice(messages)
```

The chatbot monitors user progress and adjusts plans accordingly

Got it! ⏰ What time do you attend school or extracurricular activities?

4

✨ What time blocks would you like to study (e.g., study from 9 am to 12 pm)?

each subject, how important is it to you (on a scale of 1 to 5)?

can now click on 'Download Study Plan' anytime to see it. Yo
or ask me for reminders!

The chatbot has an easy-to-use, user-friendly interface
